

TOWN OF FOREST CITY, NORTH CAROLINA

Resolution Establishing Standards for Interconnecting Small Generator Systems (Renewable as well as Non-renewable systems)

Whereas, the North Carolina Utilities Commission has adopted a modified version of the Federal Energy Regulatory Commission small generation interconnection procedures, forms, and agreements as a statewide standard designed to streamline the process of connecting small renewable generator resources, and

Whereas, these standards offer consumers a voluntary option to install renewable energy generators in accordance with certain policies and procedures as adopted hereafter; and

Whereas, the standards will allow consumers to participate as a generator in the Town's initiatives to comply with the North Carolina Renewable Energy Portfolio Standards (through its Wholesale Provider) or as a generator in the NC GreenPower program;

Now, therefore be it Resolved, that the Town of Forest City does hereby recognize the value of adopting standards for interconnecting small renewable and non-renewable energy generators and does hereby adopt the Interconnection Standards, as may be amended by the Town from time to time.

Further, be it Resolved, that the Town of Forest City does hereby establish a voluntary Interconnection Agreement, Electric Rate and Power Purchase Agreements, as those documents may be amended by the Town from time to time, for the purpose of enabling its electric customers to choose and participate as a generator in the statewide renewable energy resources initiatives.

Adopted the 21st day of June, 2021.
